PROFESSIONAL SUMMARY

Frontend Developer with 1+ years of experience building responsive, client-facing dashboard applications using React, Redux, and Material-UI. Currently developing a high-performance farm and livestock management platform with real-time data visualization and integrated payment processing. Strong foundation in UI/UX principles, mobile-first design, and REST API integration, with a track record of transitioning quickly from academic training into production-grade development work.

PROFESSIONAL EXPERIENCE

Junior Software Developer — Guava Trees Softech Private Ltd, Bhopal, India (On-site) *May 2025 – Present*

- Develop and maintain a high-performance, responsive dashboard application for farm and livestock management, used by clients for day-to-day operations.
- Build mobile-friendly, cross-device user interfaces with Material-UI, adhering to responsive and mobile-first design principles.
- Manage complex application state using Redux and Redux Toolkit across multiple interconnected modules, improving code maintainability and reusability.
- Integrate REST APIs with Axios to power real-time data visualization and dashboard reporting features.
- Implement payment gateway integration, including recurring payments and billing/subscription management for online payments.
- Translate business and client requirements into functional, user-friendly frontend components in coordination with cross-functional teams.
- Write clean, modular, and reusable React components following component-based architecture best practices.
- Debug, test, and optimize application performance to ensure smooth functionality across browsers and devices.
- Participate in code reviews, sprint planning, and daily stand-ups within an agile development workflow, using Git/GitHub for version control.
- Collaborate on-site with designers, backend developers, and stakeholders to deliver features on schedule while continuously adopting modern frontend tools and frameworks.

KEY PROJECT

Farm Management Dashboard Application | *Ongoing (Since June 2025)*

A high-performance, responsive web dashboard for farm and livestock management, featuring payment gateway integration and real-time data visualization.

Tech stack: React, Redux, Material-UI, Axios, JavaScript, HTML5, CSS3, Responsive Design

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, JSX, React Router, React Native, React Native Navigation

State Management: Redux, Redux Toolkit, Redux Thunk, React Hooks

Styling & UI: Material-UI, Tailwind CSS, Bootstrap, CSS3, Responsive & Mobile-First Design

API & Integration: Axios, REST APIs

Tools & Platforms: Git/GitHub, VS Code, WebStorm, npm

Currently Exploring: Next.js, MongoDB, Express.js

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering

2019 – 2023

Sagar Institute of Science and Technology (SISTec), affiliated with RGPV, Bhopal | CGPA: 7.6

Higher Secondary (12th Grade) — PCM (Physics, Chemistry, Mathematics)

2016 – 2018

Madhya Pradesh Board of Secondary Education, Bhopal | 73% | First Division

Secondary (10th Grade)

2014 – 2016

Madhya Pradesh Board of Secondary Education, Bhopal | 73% | First Division
